1 Big Changes

1 Listen and Discuss

Read the texts below. Find the sentence that talks about the most important event in each. After you finish reading, write the effect that each important event had.

The world is constantly going through changes. Look at some important events that have changed the world and affected the lives of many people in modern times.

THE UNIFICATION OF THE KINGDOM OF SAUDI ARABIA

King Abdul-Aziz, a gifted leader, was responsible for the legendary event that marked the beginning of modern Saudi Arabia. In 1902, he regained Riyadh, beat the city garrison, took the Masmak Fortress, and established his headquarters in the city. He expanded Saudi Arabia to include all of the Hijaz, Makkah and Madinah and united all the tribes. On September 23, 1932, the Kingdom of Saudi Arabia was officially established, as an independent country, with Arabic as the national language and the Holy Qur'an as its constitution. King Abdul-Aziz initiated the building of infrastructure and set Saudi Arabia on the road to modernization.

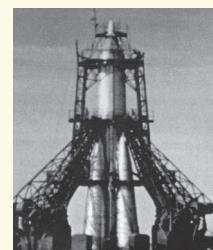

THE UNITED ARAB EMIRATES - UAE

The federation of the United Arab Emirates, known as UAE, consists of seven sheikhdoms; Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al-Khaimah, Sharjah and Umm Al Quwain. The city of Abu Dhabi in Abu Dhabi is the capital. The UAE was officially established in 1971. It came after the discovery of enormous oil reserves in Abu Dhabi in 1958. The UAE dirham, a single national currency, was launched in 1973. The oil revenues as well as income from other commercial activities have been used to develop a thriving economy and social infrastructure. Abu Dhabi now hosts its own grand prix at Yas Marina Circuit and Dubai is home to the tallest building in the world, the Burj Khalifa.

THE SPACE RACE

The Russians launched the world's first artificial satellite, *Sputnik 1*, on October 4, 1957. Next, *Sputnik 2* went up into space on November 3. The Americans won the race to land on the moon more than ten years later—with *Apollo 11* on July 20, 1969. “This is one small step for a man, one giant leap for mankind,” said astronaut Neil Armstrong, the first person to walk on the moon. Prince Sultan bin Salman bin Abdul-Aziz Al-Saud flew on *STS-51G Discovery* in June 1985 as the representative of the Arab Satellite Communications Organization (ARABSAT). He was the youngest person to fly on the Space Shuttle at the age of 28.

THE COMMUNICATIONS REVOLUTION

The first communications satellite, called *Telstar*, was launched from Cape Canaveral on July 10, 1962. This marked the start of rapid transmission of TV signals over wide areas. What we take for granted today—satellite television, cellular telephones, wireless and high-speed Internet connections, and so forth—were part of science fiction only 40 years ago. Teenagers today are the first real citizens of the digital world. Unlike their parents, they have grown up in a world in which electronic delivery of information and entertainment is natural and more accepted than conventional forms like the newspaper, tape, or film.

1 Big Changes

9 Reading

Before Reading

Think about Saudi Arabia's progress and growth since its foundation in 1932 until now.

- What are the most significant advances or changes?
- How do you think these will develop or progress in the future?

Progress towards the future

Saudi Arabia's Vision 2030

All successful changes start with a vision. Successful visions are based on strong pillars. The first pillar of our vision is our status as the heart of the Arab and Islamic worlds. We recognize that Allah the Almighty has given to our country, a gift more precious than oil. Saudi Arabia is the Land of the Two Holy Mosques, the most sacred sites on earth and the direction of the Kaaba (Qibla) to which more than a billion Muslims turn at prayer. We will expand and further develop our country to ensure that that Muslims from around the world can visit the Holy Sites.

The second pillar of our vision is our determination to become a center for global business. We will develop the economy to encourage investment from other countries and international businesses.

The third pillar is **transforming** our unique geographical location into a global **hub** connecting three continents, Asia, Europe and Africa. We will use our geographical position to improve trade and transport to and from our country.

Although our country is rich in its natural resources, our real wealth lies in the ambition of our people and the potential of our younger generation. They are our nation's pride and the architects of our future. We will support young people in finding jobs and training.

Our vision is built around three themes: A **vibrant** society, a **thriving** economy and an **ambitious** nation.

The first theme is vital to achieving the vision. We believe in the importance of a vibrant society. Members of this society live in accordance with

the Islamic principle of moderation, are proud of their national identity and their ancient cultural heritage, enjoy a good life, are protected by caring families and are supported by a social and health care system. The government is committed to supporting families and the education and wellbeing of their children.

In the second theme, a thriving economy provides opportunities for all by building an education system that meets the needs of the market. It creates economic opportunities for small **enterprises** as well as large corporations. Therefore, we will develop and **diversify** our economy to create job opportunities.

Our third theme—an ambitious nation—is built on a responsible, **transparent** and high-performing government. We will apply efficiency and responsibility at all levels.

We will also prepare the right environment for our citizens, businesses and society to be responsible and take the initiative in facing challenges and seizing opportunities.

We are confident about Saudi Arabia's future. With all the blessings Allah has given us, we cannot help but be optimistic about the decades ahead.

The future of our country is one of huge promise and great potential. Our precious country deserves the best.

Our vision, grounded in our country's strengths, will deliver this stability and create a brighter future for our country and our people.

How the Internet has changed the world

It all started in 1969 when Kline, one of Professor Kleinrock's students in LA, tried to log in remotely to a machine in Stanford.

In 1990, Tim Berners-Lee and Robert Dailliau introduced the "Worldwide Web". About 26 years later, 16 million people were online, and email was taking over. Today there are more than four and a half billion users.

E-mail, instant messaging, and video calls connect people across the globe. Social networks allow people to communicate with a large number of friends and information is accessible to everyone online. All you need to do is 'Google' a few key words and you get numerous sites and documents.

E-learning has made it possible for people to attend courses online and obtain academic and professional qualifications.

2 Careers

1 Listen and Discuss

Read the three texts below. Find the sentences that say exactly what each person does in his job.

Dream JOBS

Have you ever wondered how people get really cool jobs? Imagine you've been working at the same job for a long time, and you're getting tired of the daily grind. Maybe you can get inspiration from these lucky people and do something creative and interesting.

CAR SCULPTOR

Working with clay is normally associated with artists, not with the automotive industry. However, some of the world's largest automobile companies have a permanent staff of sculptors to help them make designs for cars and visualize ideas for future products. Salim Saif went to art school and was going to be an artist, but he ended up as a sculptor for General Motors. Salim spends his days using his hands to craft anything from miniature clay models to actual-size car sculptures. He's been working for the company since he left college, and he and his team have helped design the latest models to come off the showroom floor.

FOOD SCIENTIST

When someone says that he is a laboratory scientist, what immediately comes to your mind? You probably think of a white lab coat, sterile surroundings, a microscope, and test tubes. But that is not the case of Matthew Duval. For the last three years, he's been working as a food scientist for the makers of Tasty's ice cream, and he has created several new flavors. He's constantly searching for new combinations of flavors to keep the products fresh and interesting for the company's customers. In his lab, he experiments with different products and flavors until he gets them just right. And, of course, he always gets to taste the results. One part of Matthew's job involves market research. He's good at presenting his new products to customers and getting their input.

ANIMATION DESIGNER

Animation has been in high demand in advertising, special effects, video games, and films. Animators need to have artistic ability, creativity, storytelling ability, technical skills, scientific and technical knowledge, and the ability to work with others.

Animators need to understand character development and be able to portray character emotions in a convincing way. As computer generated imagery (CGI) technology is used in both live action films and animated movies and interactive games, it has become necessary for designers to have scientific and technical knowledge. Animation projects involve many people who work as a team. Clear and effective communication with team members and clients is crucial.

3 What Will Be, Will Be

2. Read the text. Find the sentences that talk about the future and the ones that talk about the past.

A Vision of the Future

The French writer Jules Verne wrote several books in the late 1800s. In them, he wrote about the future. He asked, “What will life be like at the end of the 20th century—one hundred years from now?” In one of his adventure novels (*From the Earth to the Moon*), his characters traveled to the moon in a rocket. In another novel (*20,000 Leagues Under the Sea*), his characters dove through the depths of the ocean in a submarine in the shape of a whale. In a novel titled *Paris in the Twentieth Century*, Verne described a city with skyscrapers of glass and steel, high-speed trains, gas-powered automobiles, and a global communications network. Space rockets and submarines and other things in his novels didn’t exist in Verne’s time, but many of the inventions that Verne imagined became reality by the end of the 1900s. That’s why people call Verne a visionary.

Comments Made in the United States in 1955: Right or Wrong Predictions?

Read the predictions below. Find the sentences that talk about the future.

"I seriously doubt that fast food restaurants will ever catch on."

"Have you seen the new cars coming out next year? It won't be long before \$1,500 won't even buy a used car."

"Did you see where some baseball player just signed a contract for \$75,000 a year just to play ball? It wouldn't surprise me if someday they'll be making more than the president."

"Soon all our kitchen appliances will be electric. They are even making electric typewriters now."

"I'll tell you one thing, if things keep going the way they are, it's going to be impossible to buy a week's groceries for \$20."

"If they think I'll pay 50 cents for a haircut, forget it."

FYI

What a dollar bought in 1955 would take about \$9.65 to buy in 2020, because of inflation. The average baseball player makes nearly \$4.5 million a year. Today a haircut for a man costs an average of \$28.

9 Reading

2. Read the text. Match a heading to each paragraph.

a. What the car contained	d. They lived to see it
b. The burial of a car	e. Everyone came to the event
c. 50 years later	

The Tulsa Time Capsule

- 1 A crowd of people gathered outside the courthouse in Tulsa, Oklahoma, in June 1957, to witness the burial of an unusual time capsule: a brand-new gold-and-white Plymouth Belvedere car. The city leaders explained: "In exactly 50 years time, this car will be unearthed to show the world who we were and how we lived in Tulsa in 1957."
- 2 The automobile contained a flag, a city phone directory, an unpaid parking ticket, and the contents of a woman's purse: bobby pins, a ladies' powder compact, a plastic rain cap, several combs, a tube of lipstick, a pack of gum, a wad of tissues, \$2.73 in bills and coins. Five gallons of gas were also included, in case the combustion engine became obsolete by 2007 and no fuel was available.
- 3 The event attracted all sorts of people to Denver Avenue that day in 1957. Some thought that the idea of burying a new car was dumb; others thought it was brilliant. Raffle tickets (for the car) were sold. The person to guess the approximate population of Tulsa in 2007 would win. "I'll never be alive," said Teddy Baxter, aged 6. "Sure you will," answered his brother Henry, who was 19. "I might not be, but you'll be around for sure." Gene McDaniel, who was 20 at the time, thought: "In 2007, I'll be 70—I'll never make it."
- 4 The Plymouth was wrapped in protective materials and lowered into a concrete vault, which was supposed to withstand even a nuclear attack. It lay there for 50 years.

On June 13, 2007, the vault was opened, and the car was raised as thousands of people watched. The organizer of the event said: "Ladies and gentlemen, I present you Miss Belvedere." Unfortunately the tomb was unable to protect the car from moisture, and the vintage vehicle was covered in rust. The contents of a "typical" woman's handbag in the glove compartment looked like a lump of rotted leather. The microfilm that recorded the names of the contestants wasn't found. There was a bit of disappointment that the items were not in better condition. However, some items inside the time capsule were in good shape—they included a U.S. flag and some historical documents, such as aerial maps of the city and postcards.

- 5 The good news is that when the Belvedere was unearthed, Teddy and Gene were still alive. They never thought they would be here to see it happen. Someone present said, "It's our King Tut's tomb. It's like a fairy tale."

3 What Will Be, Will Be

10 Writing

A. Answer the questions.

1. Read the title. Who do you think the keeper is?
2. Look at the photos. Where was the treasure hidden?

Keeper of hidden treasure

This is not a fairy tale, nor a scary story; it is the story of the discovery of 900-year-old treasure off the Korean shore.

A fisherman caught an octopus that had bits of blue pottery attached to its tentacles. At first, he thought they were shells. He caught more octopus and they all had shards attached to their tentacles. Finally, he brought up an octopus that had a whole plate caught on its tentacles.

That was when he realized that he had made an important discovery; he had heard about shipwrecks with ancient pottery, in the area. So he contacted the museum as soon as he got back.

An urgent underwater exploration led to the discovery of thirty, perfect examples of 12th century bowls, thanks to the octopus family.

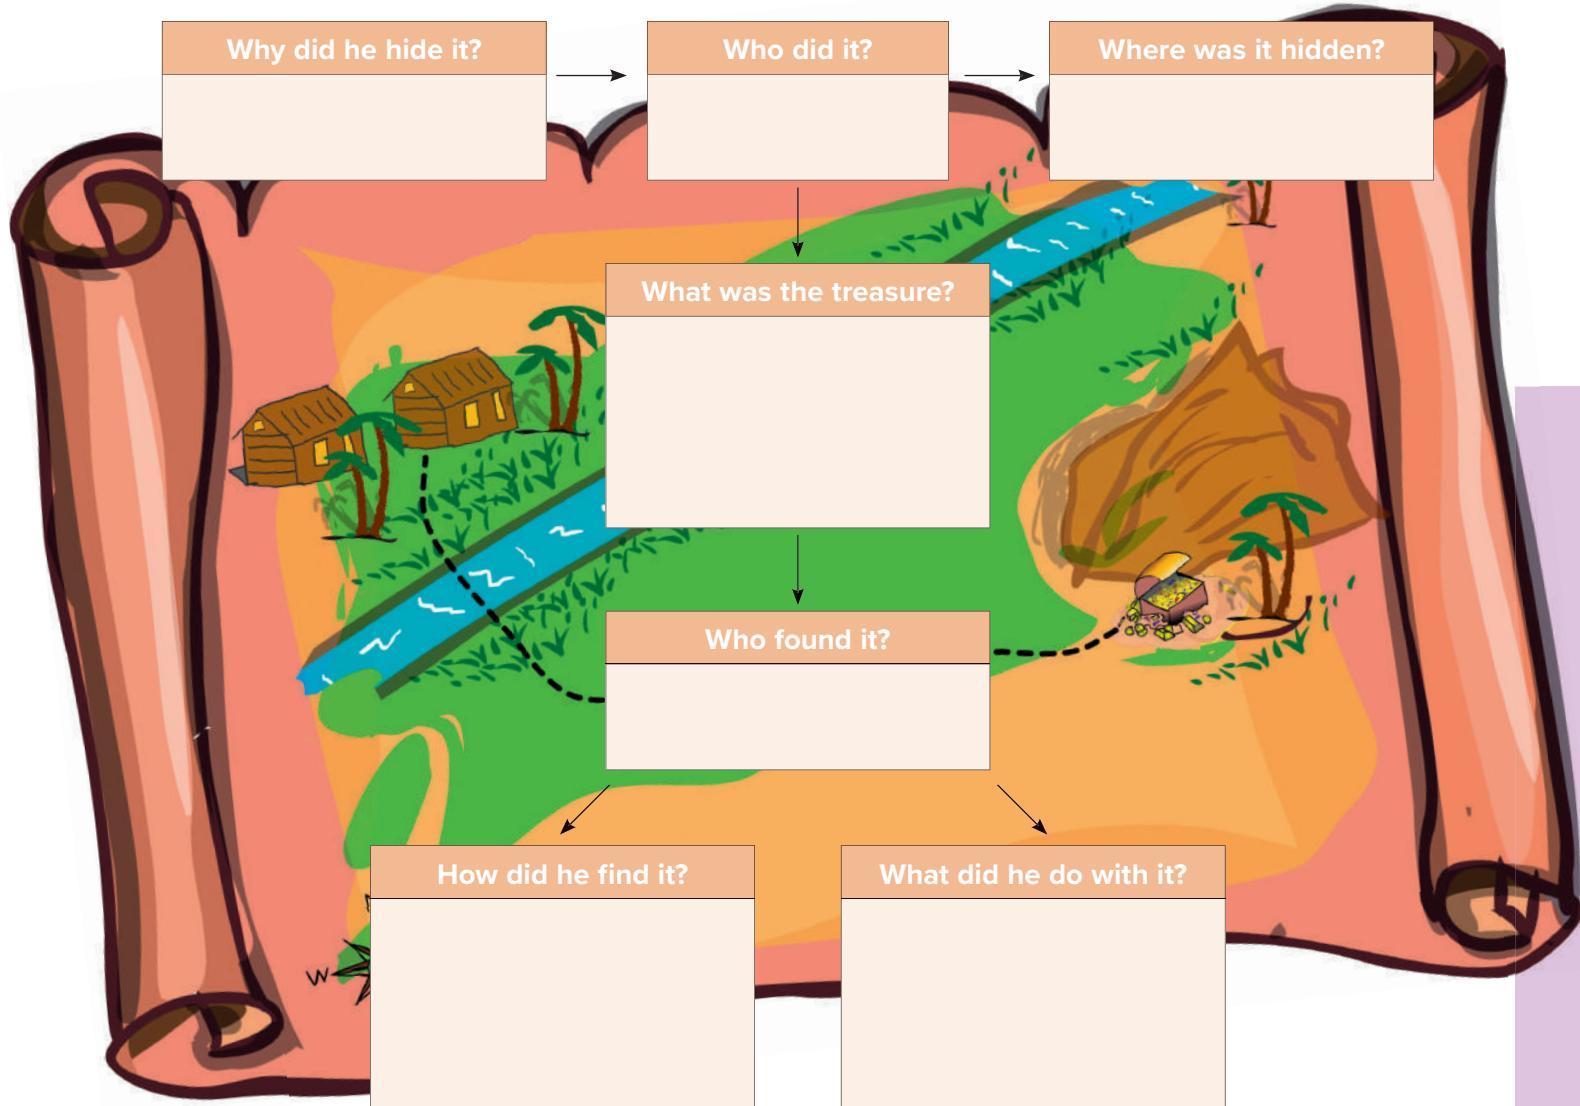

3. Read the story and make notes in the boxes.

Who found the treasure?	
Where did he find it?	
How did he find it?	
What was the treasure?	
What did he do with it?	

- B. Think of a story about "hidden treasure" that you have read or heard. Make notes in the chart below and then use your notes to write the story.

The computer and the Internet. Good or bad?

Have we become dependent on computers and the Internet?

'**Thread Started on Sept 2, 2010, 4:55 PM**'

Computers have become an integral part of our lives. They make day to day tasks easier and save time. Does that make us incapable of doing simple tasks without the aid of the computer? Can we still use hard copies of dictionaries or books? Can we write by hand?

I think most of us can. Not having to do things in a conventional manner allows more time for thought and creativity.

Re: Computer and the Internet. Good or bad?

'**Reply #1 on Sept 2, 2010, 5:21 PM**'

I agree that computers and the Internet are valuable tools that provide access to information quickly and efficiently. On the other hand, literacy appears to be affected in more ways than one. People don't bother to learn how to spell correctly or write by hand. They sometimes rely on the computer to correct their grammar and spelling. I know my handwriting has suffered since I started word processing.

Re: Computer and the Internet. Good or bad?

'**Reply #2 on Sept 2, 2010, 7:43 PM**'

Does it matter if we are not all adept at handwriting? At the end of the day, technology is here to stay. If computers can help us write, why should we write by hand? Isn't it better to invest that time on learning?

Re: Computer and the Internet. Good or bad?

'**Reply #3 on Sept 3, 2010, 4:01 PM**'

Learning is the big issue here. Does technology foster learning or does it provide ready data that do not promote critical thinking? And what about math? There seem to be more and more young people who are unable to calculate. They are completely dependent on computers.

Re: Computer and the Internet. Good or bad?

'**Reply #4 on Sept 3, 2010, 9:40 PM**'

The Internet has contributed greatly to learning, through the wealth of information it can provide, on a wide range of topics. In addition, it has made it possible for people to study through e-learning. In other words, the Internet has brought schools and universities to people, wherever they might be, provided that they are connected.

Re: Computer and the Internet. Good or bad?

'**Reply #5 on Sept 6, 2010, 5:12 PM**'

Our teacher says that the Internet prevents us from developing our memory, an important aspect of learning. He thinks that easy access to information prevents learning, simply because we do not have to make any effort to memorize. I don't agree. Memorizing facts is not an effective way of learning. There are a lot of people who are unable to do that, yet when you talk to them or let them present a viewpoint or solve a problem, you realize they are highly intelligent and articulate. I am getting confused. Can someone help?

- E. How would you reply? Work with a partner and write a brief reply. Compare your replies in class.

1. Students in my country have been using computers for _____.

2. Write about yourself.

(use computers) _____

(write by hand) _____

(use spell-check) _____

(learn online) _____

3. Add your own ideas.

- F. Which of the things mentioned in the text will people be doing in 100 years/in the future? Compare your ideas with a partner.

I think people will still be using spell-checks in 100 years.

I don't think people will use spell-checks in the future.

2 Reading

Before Reading

1. Look at the photo of ancient Egyptians. What do you notice about their eyes?
2. What did they use for the heavy eye make-up that is so noticeable in the wall painting?
3. What was the purpose of the make-up?

EYE MAKE-UP IN ANCIENT EGYPT

Ancient Egypt's striking eye make-up protected wearers against eye disease, according to French scientists. The make-up was concocted with a mixture of lead and lead salts and it was used to adorn the eyes and ward off evil!

Philippe Walter, who co-headed a team of scientists from the Louvre museum and the CNRS (National Center for Scientific Research, France), pointed out that this observation had been made in the past by ancient Greeks and Romans who believed that the make-up had medicinal properties, but the team wanted to determine the exact composition and how it worked.

Contrary to widely held belief that lead is harmful, the team demonstrated that in very low doses lead does not damage cells. The research was carried out with a tiny electrode, to observe the effect of Egyptian lead chloride on a single cell. It proved that lead produces a molecule that activates the immune system which in turn attacks bacteria in case of an eye infection. So, make-up was used as a disinfectant and more importantly as preventive medication.

6. _____ molecule f. the smallest part of a living thing
7. _____ preventive g. the smallest unit that a substance can be divided into while maintaining its chemical nature, usually consisting of two or more atoms
8. _____ striking h. the system that the body uses to protect itself against disease or infection

4 Chant Along

I Wonder What They'll Be

My children will be grown some day,
And I hope I'll still be here
To see what they will be.
But whatever they may do
They won't be needing me
To take them by the hand.
Hoping they'll be kind
And praying that they'll find
A castle made of stone and not of sand.

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

My children will be grown some day,
But I might not be around
To hear what they will say.
I wonder if they'll understand
The things I've wished for them.
When they're on their own,
Will the path I've shown
Help them carry on,
And bring love and light
To their own home?

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

In 1817, a steerable front wheel was developed by Baron Karl von Drais in Germany, and in 1839, the first pedals were introduced by Kirkpatrick MacMillan, a blacksmith from Scotland. 9 Reading

Before Reading

- What words do you think of when you read the words “credit card”?
- Read the text and write sentences to show the history of the credit card. Use the timeline below.

The World of Plastic

1 Can you imagine a world without credit cards? Until the 1950s, a world without the use of cash was simply inconceivable. Today an economic universe without plastic would be impractical. Whether it's for business or for leisure, the credit card is used to pay for goods and services from New York to Beijing.

2 It all started in 1949 when Frank McNamara scheduled a business dinner in a New York restaurant. Before he left for the dinner, Frank changed suits. When the waiter presented the check, Frank realized that he had left his wallet in the other suit. The embarrassing situation was solved, but that night Frank asked himself: “Why should people be limited to spending what they are carrying in cash, instead of being able to spend what they can afford?” A year later, Frank returned to the same restaurant in New York. When the check came, Frank handed the waiter a small cardboard card, a Diner’s Club Card, and signed for the meal. This event is known in the credit card industry as the “First Supper.” Soon the concept of “charging it” was picked up by merchants as an alternative form of payment to the use of cash. By 1952, the Diner’s Club Card was accepted by thousands of businesses across the United States, and it became a status symbol for those who carried it.

3 The Diner’s Club Card soon became a cultural icon. Hollywood cashed in on the “charge-it craze” with

the 1962 movie, *The Man from the Diner’s Club*. In it, an employee at Diner’s Club issues a credit card to a well-known gangster and has to get it back in order to keep his job. The Ideal Toy Corporation joined in the trend when it created a board game called the *Diner’s Club Game*. The idea of the credit card quickly expanded outside the United States. The Diner’s Club Card became the first international charge card in 1952 with franchises in Canada, France, and Cuba. In 1955, Western Airlines became the first airline to accept the Diner’s Club Card. Ten years later, the card was accepted by every airline in the United States. Diner’s Club expanded its services to hotels, car rentals, and other businesses.

4 Other famous international credit cards have been created such as American Express, Visa, and MasterCard. There are hundreds of local bank cards, department store credit cards, supermarket credit cards, and so forth around the world.

5 In 1984, the first card members rewards program was created, aimed mostly at business travelers. It gave valuable benefits and special privileges to loyal users. Now many reward programs offer free airline miles and discounts on hotels and other products.

6 Ever since a businessman forgot his cash in 1949, people have used credit cards. An entirely new business was created that revolutionized the way the world has paid for goods and services ever since.

The Invention of the Cell Phone

The history of the cell phone goes back to Michael Faraday who researched into whether space could conduct electricity, in 1843. His work had a substantial effect on the development of cellular phones. Dr. Mahlon Loomis, a dentist, was the first person to communicate through the wireless atmosphere in 1865. He developed a method of transmitting and receiving messages through the atmosphere.

Dr. Martin Cooper is considered to be the inventor of the first portable cellular phone. He was the first person to use a cellular phone in 1973.

Cell phones went public in 1977 with trial testing in Chicago and eventually other cities in the US. As the cell phone became more popular, it drew the interest of large companies and was introduced in more places around the world.

The Cellular Technology Industry Association (CTIA), developed in 1988, set goals and standards for cellular phone providers.

In spite of consumer demand, it took cellular phone service nearly 40 years to become commercially accessible. It has now become one of the largest industries internationally with billions of users.

5 Did You Hurt Yourself?

1 Listen and Discuss

In which pictures did the people hurt themselves? How can they prevent that from happening? In which pictures were the people not hurt? Why weren't they hurt?

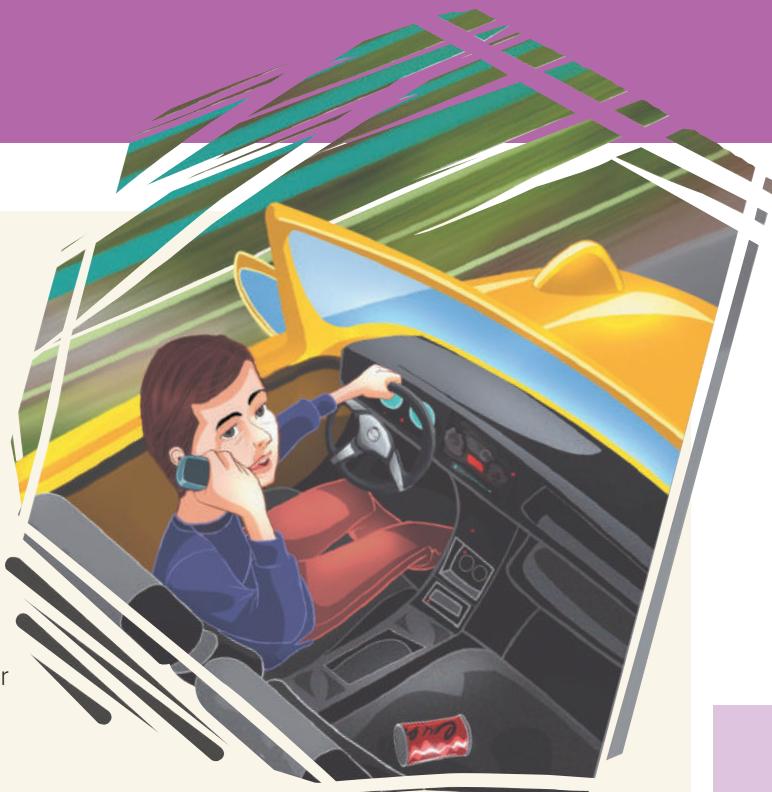

Common Accidents

The Most Common Causes of Automobile Crashes

An average of 20 Saudi Arabian residents die on the country's roads each day, according to a report by the Saudi General Directorate of Traffic. Approximately 1.35 million people die each year on the world's roads, or one person every 25 seconds!

- 1. Distracted Drivers:** Many accidents occur when drivers don't pay attention and take their eyes off the road. Many occur when drivers are talking on their cell phones, adjusting the radio or CD player, or reading maps or even newspapers or other documents.
- 2. Driver Fatigue:** Drowsy and tired drivers are a danger. They may misjudge traffic situations, fall asleep at the wheel, or go off the road. The most common time to encounter tired drivers is between 11 P.M. and 8 A.M.
- 3. Speeding:** Speeding increases the risk of crashing, reduces the amount of time necessary to avoid a crash, and makes the crash more severe if it occurs.
- 4. Aggressive Driving:** Here are some characteristics of aggressive drivers: They ignore the safety of others and take risks, such as by tailgating (driving too close to the driver in front), using rude gestures or verbal abuse, and not obeying traffic signs.
- 5. Bad Weather:** Heavy rain, snowstorms, sandstorms, high winds, and fog make driving more difficult. Drivers may have trouble seeing the road clearly. Drivers should slow down, and if necessary, pull off the road until the conditions improve.

Samir: So, how did you hurt yourself?

Jasem: I fell off my bike.

Samir: Really? So did I. My motorcycle skidded on a patch of oil on the road, and I crashed into a car. The last thing I remember was flying through the air and hitting the windshield. I woke up in the hospital.

Jasem: Were you wearing a helmet?

Samir: Yes, luckily I was. That's what probably saved my life. How about you?

Jasem: I was cycling in the park, so I didn't think I'd need a helmet. I don't like wearing helmets—they're uncomfortable and unattractive. This squirrel came out of nowhere. I swerved, lost my balance, and hit a tree. I got off lightly—only a few bruises and a bump on my head.

Samir: It was your **lucky day**!

Jasem: Yeah. That's too bad you broke both legs. You're going to be **stuck in** that wheelchair for a while, **I guess**.

Samir: **Look at it this way**—if I broke only one leg, there might not be enough room for all my friends to write their names on the cast. Hey, would you like to sign your name?

9 Reading

Before Reading

Read the events. For each event, write one sentence that describes the happy or unhappy ending that the people had.

Unusual Accidents and Deaths

Many people are interested in stories of unusual accidents—some of these stories have happy endings, but some, unfortunately, have unhappy ones.

UNHAPPY ENDINGS

According to the legend, the ancient Greek playwright Aeschylus was killed when an eagle dropped a tortoise on his head. The bird was trying to break the tortoise's shell on a rock in order to eat it. Aeschylus was bald, and the eagle thought the unfortunate man's head was a good rock on which it could break the shell.

An eight-foot tall ostrich was seen weaving through heavy traffic on a Saudi Arabian highway, near Abha. One of the drivers filmed the scene and uploaded it on the internet. No one tried to stop and catch the 180-kg bird that was taller than humans and ran at almost 70 km per hour. It had probably escaped from a farm and ran into heavy traffic instead of the wild.

Some people worry about being hit from things falling from outer space. There is only one person in all recorded history who has been killed by a meteorite—Manfredo Settala. The tragedy happened in 1680.

Ahmad Ali lost his eight-year-old son in a drowning accident at a friend's house. His son had been invited to join other children at a friend's house to play and swim in the pool. According to the invitation a lifeguard was going to be present. The young boy was really excited and begged his father to let him go. So, Ahmad Ali picked him up from school and drove him to his friend's house before 1:00 p.m. That was the last time he saw him alive.

HAPPY ENDINGS

A German soldier was riding in the back seat of a World War I plane when the engine stalled as a result of an unusual gust of wind. He fell out of his seat while the plane was high above the ground. As he was falling, the plane's engine started again, and he landed back in his own seat. The pilot was then able to land the plane safely.

Bob Hail jumped out of an airplane in November 1972, but his main parachute failed to open. His backup parachute also failed. Bob dropped about 3,000 feet (900 meters) at 80 miles (128 km) per hour and hit the ground face first. After a moment, he got up and walked away with only minor injuries. It was an amazing escape.

In September 2007, Phil Lamattina escaped death when he was driving at over 300 miles (500 km) per hour in a drag race in Brisbane, Australia. Phil was racing down the track when his car became airborne, split in two, and burst into a fireball. He was knocked out, but he survived. Although he was in the midst of the ball of fire, Phil was burned only on the tip of his finger. When his brothers later showed him the video of the accident, Phil couldn't believe he was watching himself—and that he had such a lucky escape.

Railroad worker Phineas P. Gage was working with some dynamite when it exploded unexpectedly. A bar that was 3 feet (1 meter) long and that weighed 13 pounds (6 kg) went clear through his head. He remained conscious, but was unable to see out of his left eye. After a while, his sight returned, and he fully recovered.

1. How many people drive in your family? How do you feel about driving?
2. What kind of car would you like to drive? Why?
3. Which age group causes more accidents: teenagers, people over 25, people over 60? Why?

Where it happened:

How it happened:

Who caused it:

Who it happened to:

Why it happened:

Write the words and/or phrases next to the headings.

Now cover the text and use your notes to summarize the accident in your own words.

Use so, because and although to connect your ideas. For example:

Although he was wearing his seatbelt, he still hit his head.

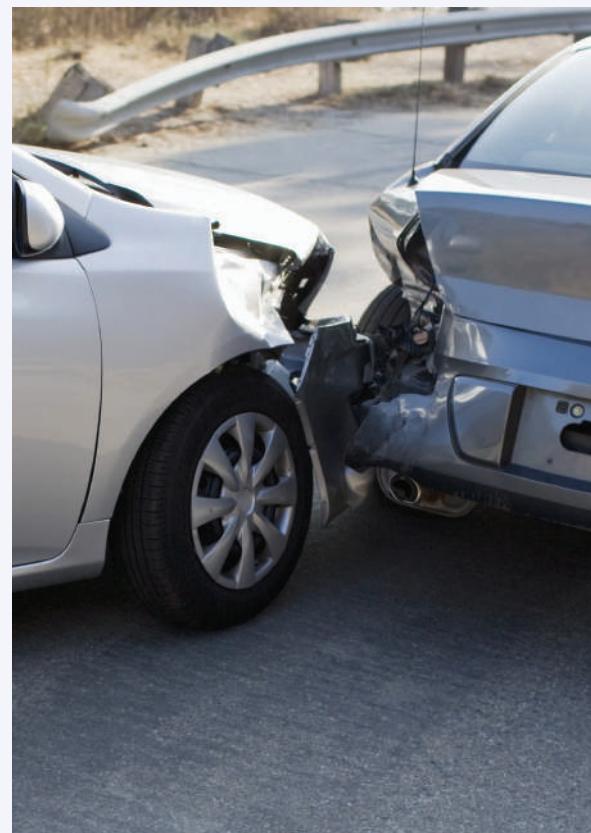

THE ACCIDENT

It was morning and my older brother was driving me to school. Suddenly, a speeding car crashed into us at an intersection and threw us into a telephone pole. I was, fortunately, wearing my seatbelt but I still managed to hit my face on the dashboard.

I was unconscious for some time and woke up as I was taken out of the car and put into an ambulance. The driver of the car that hit us was also in the ambulance. I heard him say he was 90 years old. I was 15, scared to death and likely to end up with a scarred face for life. I started yelling "Please stop driving! Stop driving!" I could not stop.

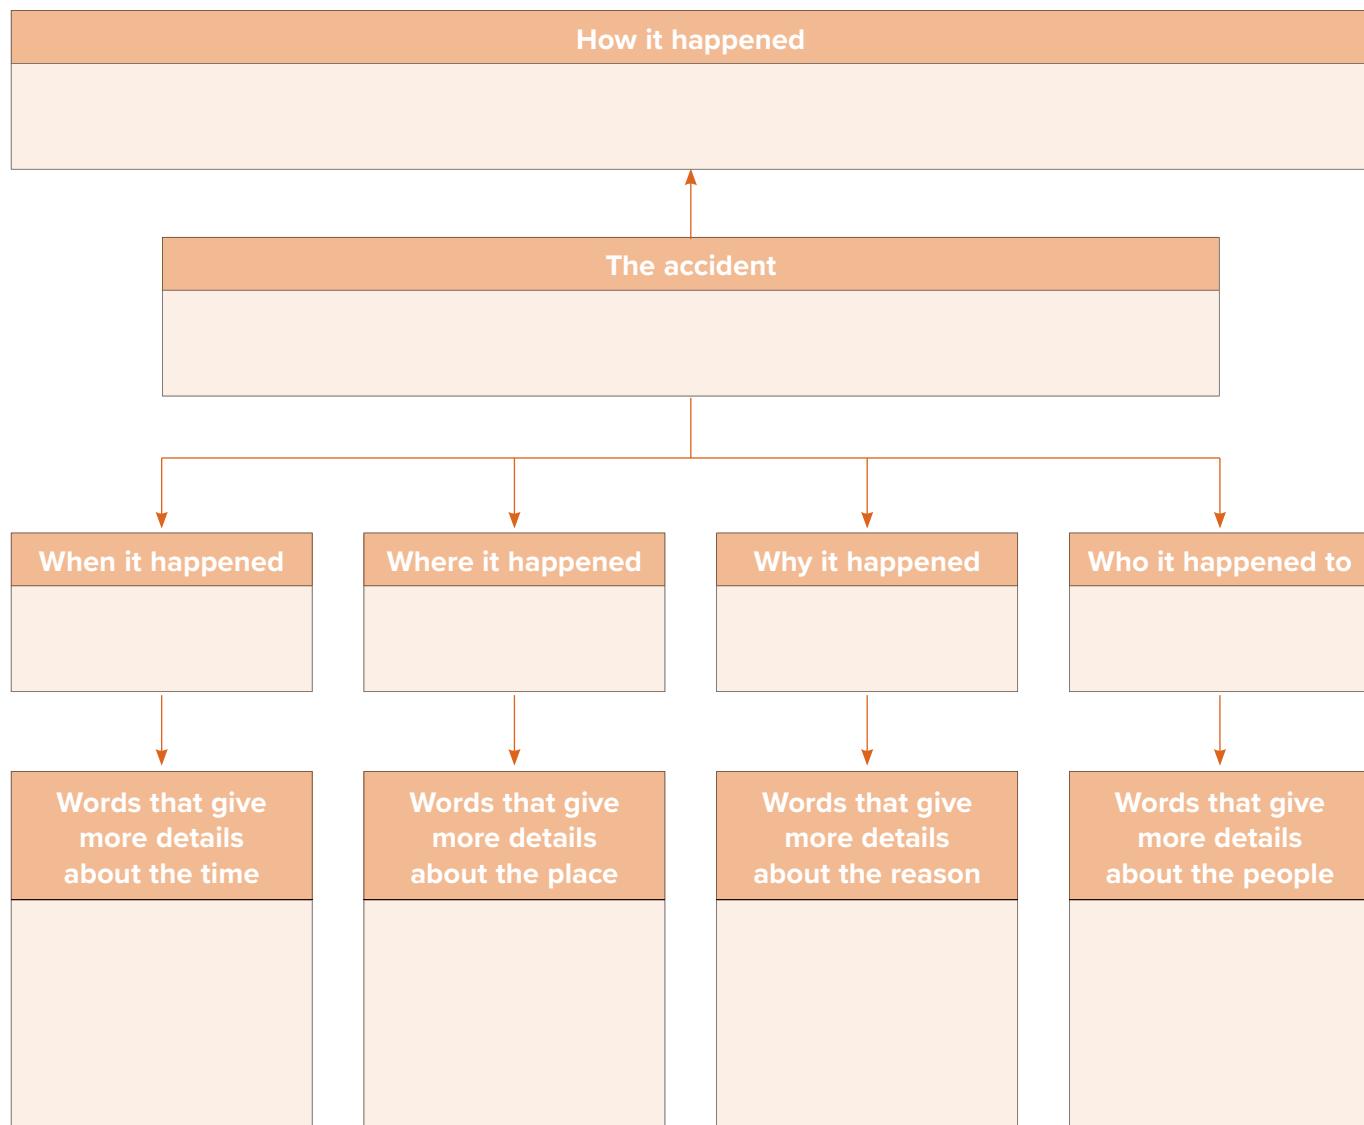

I don't know what happened to the man, I never saw him again.

I was released from hospital two weeks later. Since then I have always been a cautious driver and advised others to be careful.

C. Have you ever seen an accident? Have you recently heard or read about an accident? Write a short account of the event.

1. Complete the organizer with as much information as possible in note-form.
2. Write as many words and/or phrases as you can to describe the experience or the event.
3. Use your notes in the organizer to write an account of the accident.

Writing Corner

When you write an account of an accident and refer to an incident as an eye witness or as a participant:

- Do not use **very long**, complicated **sentences**.
- Connect events and reasons or causes when necessary, using: *so, because, although*, etc.

Do you look up web sites that give advice? What do you search for?

The screenshot shows a web browser window displaying the HelpSite4U website at <http://helpsite4u.com>. The page features a yellow header with the text "You've got questions? We've got answers." and the HelpSite4U logo. Below the header are six purple buttons labeled "Leisure", "Health", "Eating", "Friends", "Travel", and "School/College". A mouse cursor is hovering over the "School/College" button. The main content area has a blue header "Saying NO to junk food". It contains a bulleted list of tips:

- You want to stay healthy? Then you'd better stay away from fast food. Turn it down!
- The labels *fast food* or *junk food* refer to food that contains a lot of fat and is cooked in an unhealthy manner. Younger people tend to eat more junk food because of peer pressure.
- You should keep your principles and your sense of self-worth. You deserve healthy and nutritious food. So in the case of peer pressure, just say NO!

To the right of the list is a red-bordered box containing a phone icon and the text "HOTLINE! For help at any time, talk on the phone with one of our counselors. Click [here](#) for more information."

Below the main content are two sections: "Weight Control" featuring a photo of two men in traditional Saudi attire discussing weight loss, and "Anorexia" which provides a definition and some facts about the disorder.

Keeping Fit

Fitness means “being in good physical condition—healthy and strong” and is usually associated with exercise. That is not the whole picture. In order to keep fit, you have to eat well, sleep well, and generally feel good about yourself.

I know I should exercise, but I keep putting it off.

You ought to take up a sport, or you could work out with me if you like.

Driving

Some tips on driving

- You should avoid:
 - driving too fast
 - driving through a red light
 - speaking on the phone while you are driving
 - overtaking other cars on a narrow road
 - racing
 - *drifting* on a busy road

Staying safe on the road

- You should always wear your seat belt, even for short distances.
- You ought to observe speed limits, especially when you drive through towns.
- Try to slow down at intersections even if you have right of way.
- You might check the route before you start, especially if you are going to a new place.

Mohammed: I'm **feeling down**. It's all these exams coming up. There's so much pressure and everyone's calling me all the time, to ask about this or that. When I'm out they're constantly calling me on my cell phone to ask for help. If I say I can't speak, they want to know what time I will be available and where I will be so they can come over or call again. Why don't they call someone else?

Hussain: You ought to talk to them and explain that they can't expect you to be free to help everyone all the time. You have work to do as well.

Mohammed: I tried talking to them, but they say I'm being selfish, and **looking out for myself** and nobody else. Oh, I give up!

Hussain: They probably think you don't need to study; you know it all anyway.

Mohammed: Seriously? Of course, I need to study. I don't remember everything we've done. Do you get calls from classmates?

Hussain: Sure. They're pretty nervous about calling you, so they call me first to find out what kind of mood you're in. **To be honest**, I would be really happy if you talked to them. I don't know what to say to them anymore.

9 Reading

Before Reading

1. Write down what you think are the main ingredients that attract people to junk food. Share your answers with the class.
2. List the factors that normally lead people to become addicted to junk food. Share your answers in groups.

Good eating habits contribute to health and fitness and make you feel strong. "What is so good about a diet of vegetables and fruit combined with lean meat, preferably chicken or fish?", you might ask. If you are very tired, hungry, and upset there is nothing better than a juicy beef burger with fries or a giant pizza, you think. That's probably true if your brain has gotten used to the pleasure felt when tasting junk food. But is it good for you? Does it help you stay fit and control your weight? How do you feel after you've had a meal? Are you sure it's not time to break the habit?

Breaking the habit—Getting healthy

The following is a checklist to help you decide if it's time for you or a friend to change eating habits. Just ONE "warning sign" should be enough reason to take action.

- ✓ You shouldn't think 'junk food' the minute you start feeling hungry. There never is an acceptable reason for this. It is a definite sign of a habit that is on the way to becoming an addiction.
- ✓ Comfort eating is usually associated with junk food and in general, high calorie food that is also high in carbohydrates [starch and sugar] and saturated fat. If you run to the nearest fast food chain every time you feel down, you know it is out of control.
- ✓ A healthy, nutritious meal does not have to be bland and boring. When pushed you can picture appetizing dishes that do not contain fries or fatty ingredients but you still prefer to get hold of a beef burger or a pizza. You know it's not the best food for you. You know that you are going to feel sleepy and tired after you have eaten.
- ✓ To be honest, healthy is a relative term. It all depends on what your alternatives are. There are 'healthier' choices you can make even at a fast food restaurant. You might, for example, order salad as a side dish instead of a second helping of fries. You could avoid condiments such as ketchup or mayonnaise, or eat a chicken burger. You know all this, you have promised yourself to do it next time you are there, but somehow it never happens. You keep on insisting that those dishes take longer to prepare.

But breaking a habit can leave you feeling down. Don't worry, this is quite common; and it shouldn't last very long if you stick to your decision to give up junk food.

- You ought to decide on your own if it's best to cut down on the amount of junk food you eat, gradually over a period of time, or whether it's best to stop altogether for some time.
- You should allow yourself some time to do it successfully.
- You shouldn't give up simply because you were with friends and joined them for dinner at a fast food restaurant, or because you helped yourself to a few fries.
- Pick up some menus from different restaurants and read them carefully, paying attention to the ingredients of each dish. Then highlight the dishes that you find interesting.
- You might go to the supermarket and wander around making a list of all the food and ingredients that you find attractive.
- If a friend insists on offering you junk food, turn down the offer and treat yourself to something nice. The important thing is to regain control and only eat junk food when nothing else is available or very occasionally for a change.
- Make a list of all the things you enjoy doing but had to give up because you gained weight or do not feel energetic enough. Decide what you would like to do again and when. Set yourself goals that are achievable and enjoyable. Treat yourself right!

10 Writing

A. Consider the following and discuss with a partner.

1. Do you have friends who live in another city or country? Do you write to them? Do you know anyone who does?
2. Would you like to move to another place? Why?
3. What would you miss if you moved to another town, city or country?
4. Read the letter and identify the problem.

Dear Faisal,

I hope you have had a good school year. I am sorry I haven't written sooner but it has been very busy and difficult for all of us. Moving to a different city has not been easy. I miss you and all our friends.

I have made some friends at my new school but I am still considered 'the new student' so I never get invited anywhere. I tried to invite some of my classmates during the holiday but only one turned up. The rest didn't even call to let me know that they couldn't come.

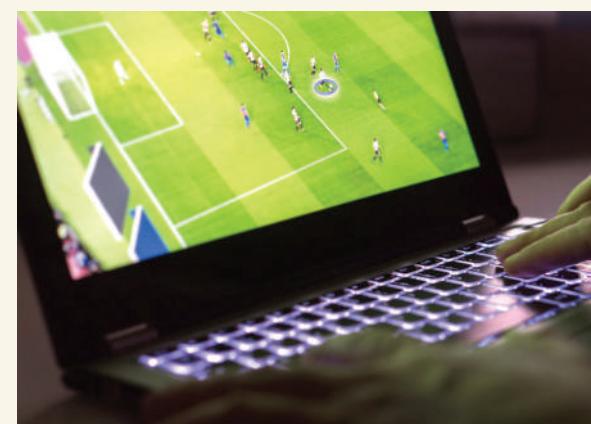

I have tried to be nice to everyone and give them and myself time to get to know each other but nothing has come of it. I have been feeling down for some time and I can't concentrate. My grades have dropped and I have gained a lot of weight because I get no exercise. They won't let me play football with them.

I feel like giving up on everything. All I do is go to school, come back home, do my homework, and play video games on my own. I don't know what to do.

If you have any tips, please write and tell me what to do and what not to do. I can't think straight any longer.

Hope to see you soon,

Nasser

5. Read the letter again and make notes in the organizer.

The problem:	
The cause of the problem	Your advice or solution to the problem

6. Write your letter of advice to the person with the problem.

Writing Corner

When you write a letter of advice make sure you:

- **Repeat/echo** each problem in your own words to show the person that you have been “listening” and you **understand** what they are talking about.
- Put yourself in the person’s place and **acknowledge feelings**.
- **Do not judge** the person, try to **help**.
- **Do not dictate** or patronize. Show empathy with the person. Make helpful suggestions about how they can improve their situation.
- Always close on a **hopeful note**, e.g. I am sure things will get better soon; they usually do. OR I believe you will deal with this in your own wonderful way; I’ve seen you do it before.

Make sure you use words and expressions such as:

I am really sorry to hear ... / I understand how you feel/ I would feel the same way/ I don’t understand why people do this sort of thing...

I think, maybe, you should ... / How about ... ing/ Have you tried ... / I would ... but then again, you know best/ It’s hard to imagine what it feels like .../ I wouldn’t like to be in your place ...

Practice using some of this language by responding to these statements.

1. My computer crashed and all my emails were deleted. I don’t know what to do.

2. My friend wants to borrow my camera. I’ve only had it for a month and it’s a very expensive, sensitive camera that needs to be handled carefully. I don’t know what to say.

Teenage Stress

Definition

Stress—the mental and physical strain or the nonspecific response of the body to any demand made upon it. Stress is a chemical reaction that takes place inside the body when there is a basic need to adapt to or resist changing internal or external influences. It is a response meant to return the body and mind to a state of equilibrium and balance.

The Causes of Stress

Although adolescence is often viewed by parents as a carefree period of life, some studies show that teenagers experience the most stress of all people. They can experience stress related to money, family problems, self-esteem, acceptance by their peers, getting accepted into college, choosing a career, and pressure to do well in school, sports, or clubs.

According to experts, one of the main reasons for stress is that childhood has gotten shorter, and the perception of children has changed. Since TV is available to all audiences, children can get messages that were probably meant for adults, and the dividing line between childhood and adulthood is less and less clear. Children do not play as many of their own games as they used to, and most of their games and sports nowadays are those preferred by adults. Youngsters wear similar clothing to that of adults, and they use adult language that was once never to be heard from a child. Young people these days are under tremendous pressure to achieve, to please, and to succeed. They are expected to adjust to social changes that past generations have never had to deal with. The demands made on preteens and teens by modern life have definitely increased the level of stress.

Tips for Dealing with Stress

All humans experience stress. It is a necessary part of life. The response to stress is what often needs to be controlled. A person's feelings, attitude, and outlook on life affect his or her ability to deal with stress.

- You should avoid unnecessary worry. Thinking about a problem in order to arrive at a solution can be positive, but constant worry is not constructive, and it accomplishes nothing. It usually just makes situations more stressful.

- Read and listen to the Qur'an. It will help refresh your heart and mind. Remember that prayer and patience can combat stress and anxiety.
- Be thankful for what you have and start each day on a positive note. Remember that each day is a gift. Thank Almighty for the gift of life and greet the day with optimism and gratitude. Remember that you are not alone.
- Become better organized. Plan activities a step at a time so that parts are accomplished. This gives you more self-esteem and more reasonable deadlines.
- You should be aware of the symptoms of stress. Some symptoms are: moodiness; insomnia or other sleeping disorders; lowered body resistance to colds, flu, or other

| 2. ____ adapt | b. opinion, often based on observation |
| 3. ____ carefree | c. without worry |
| 4. ____ self-esteem | d. worry, anxiety |

| 6. ____ perception | f. to change to fit a new situation |

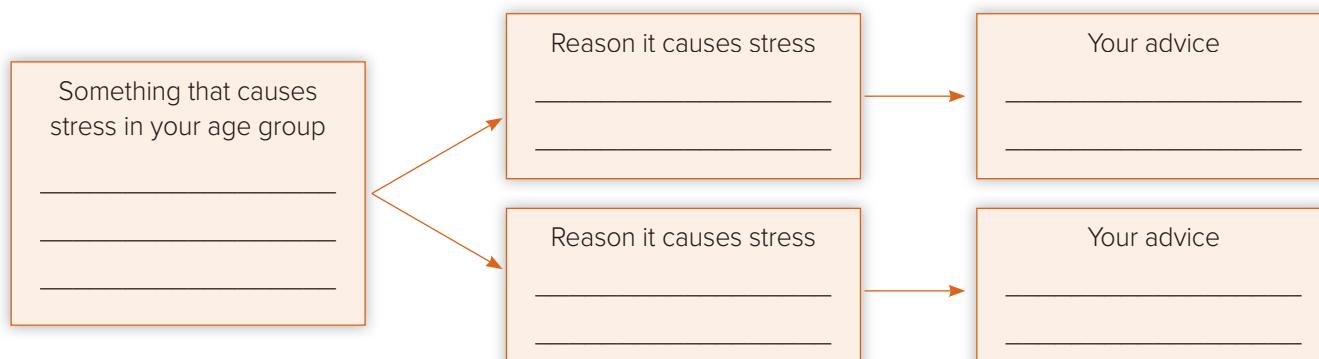

B. List the causes of stress for teens.

3 Writing

Write two or more important things that cause stress in your peers. Give some advice for handling these things. Copy the organizer below into your notebook and write your notes in it. Then use it to help you write.

diseases; preoccupation with negative/angry thoughts or feelings; unusual behavior patterns; loss of appetite, or eating disorders such as anorexia or bulimia.

- When you know you have a problem with stress, try to solve it one step at a time. Part of the problem could be trying to do too much at once. You should take it in easy stages.

Conclusion

Stress doesn't need to be negative. Some doctors say that you should laugh and smile more frequently to help deal with stress. When you laugh and smile, your body relaxes, and the result is an overall positive reaction. Don't forget that it is the effort that counts more than the result.
