Culture page

A. Read the title of the text. Do you know anything about names and surnames? Listen, read and compare your answers.

The History behind a name

Do you know what your name or surname means? Names usually mean something about the personality of people, while some surnames tell us about the history of a family.

For example, in Arabic, some common names with beautiful meanings are:

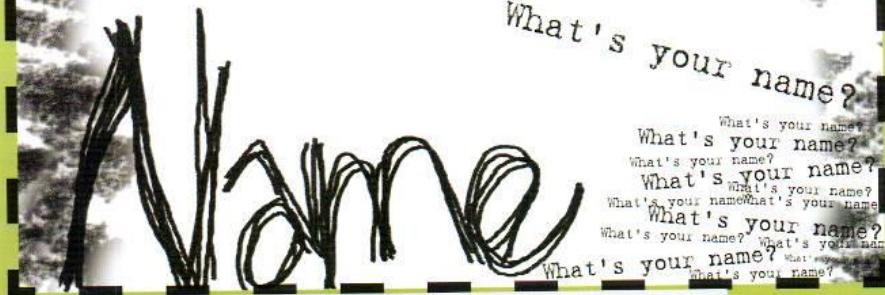

Karim, which means *generous*

Ameer, which means *prince*

Jameel, which means *beautiful*

Also, 'ibn' means 'the son of' and bint means 'the daughter of'. Therefore, Bassam ibn Ameen ibn Musa Al-Ahmed means Bassam, who is the son of Ameen, and grandson of Musa. Al-Ahmed is Bassam's family name.

This Arab custom influenced some European family names as well. In English-speaking countries, many surnames have the same beginning or ending. So surnames with the ending 'son' mean 'the son of'. Davidson and Robertson (the son of David and Robert) are very common. In the USA, different versions are more common for these surnames, like Davis instead of Davidson or Roberts instead of Robertson. In Ireland and Scotland, surnames with the beginning 'Mac' or 'Mc' mean 'the son of', too. For example, MacDonald is the son of Donald. In Ireland, they also have 'O' before names. 'O' means 'of', so O'Brien is the son of Brien.

B. Read again and answer the questions.

1. What do most names tell us?

2. What does 'bint' mean?

3. What do Davidson and Robertson mean?

4. In which countries do surnames begin with 'Mac' or 'Mc'?

During the week, Ahmed doesn't see his friends. When he finishes work, he goes to university. He goes home at about 8pm and then he studies. He has a busy day, but he doesn't mind. "Mr Al Saad is like a grandfather to me. I can see my friends at the weekend," says Ahmed.

Information Technology

A. What do you think spamming and phishing are?
Listen, read and find out.

Phishing for danger

The Internet is part of our everyday lives. It helps us a lot: we find information, we send e-mails, we buy things, etc. and it's easy to use. But be careful! There are lots of dangers, like spamming and phishing.

Spamming is sending unwanted e-mails like advertising material over the Internet to a large number of people. You can get lots of spam even on your fax machine or on your mobile phone as SMS! Junk e-mail is a type of spam. These e-mails try to make you buy things.

Phishing is a very big problem, because the 'phishers' want to get your personal information, like your bank or credit card numbers so they can use them. Phishers make a fake website that looks exactly like another website and send the link to people. People see it and think that it's from a bank, for example, and fill in their personal information. Phishing is common on social networking websites. So, be careful!

B. Read again and answer the questions.

1. Where can you get spam?
2. What does junk e-mail want people to do?
3. What do phishers try to get?

Life in Tornado Alley

Every year in the US there are about 500 tornadoes from Texas through Oklahoma, Kansas, Nebraska, Iowa and into South Dakota. That's why this area is called "Tornado Alley".

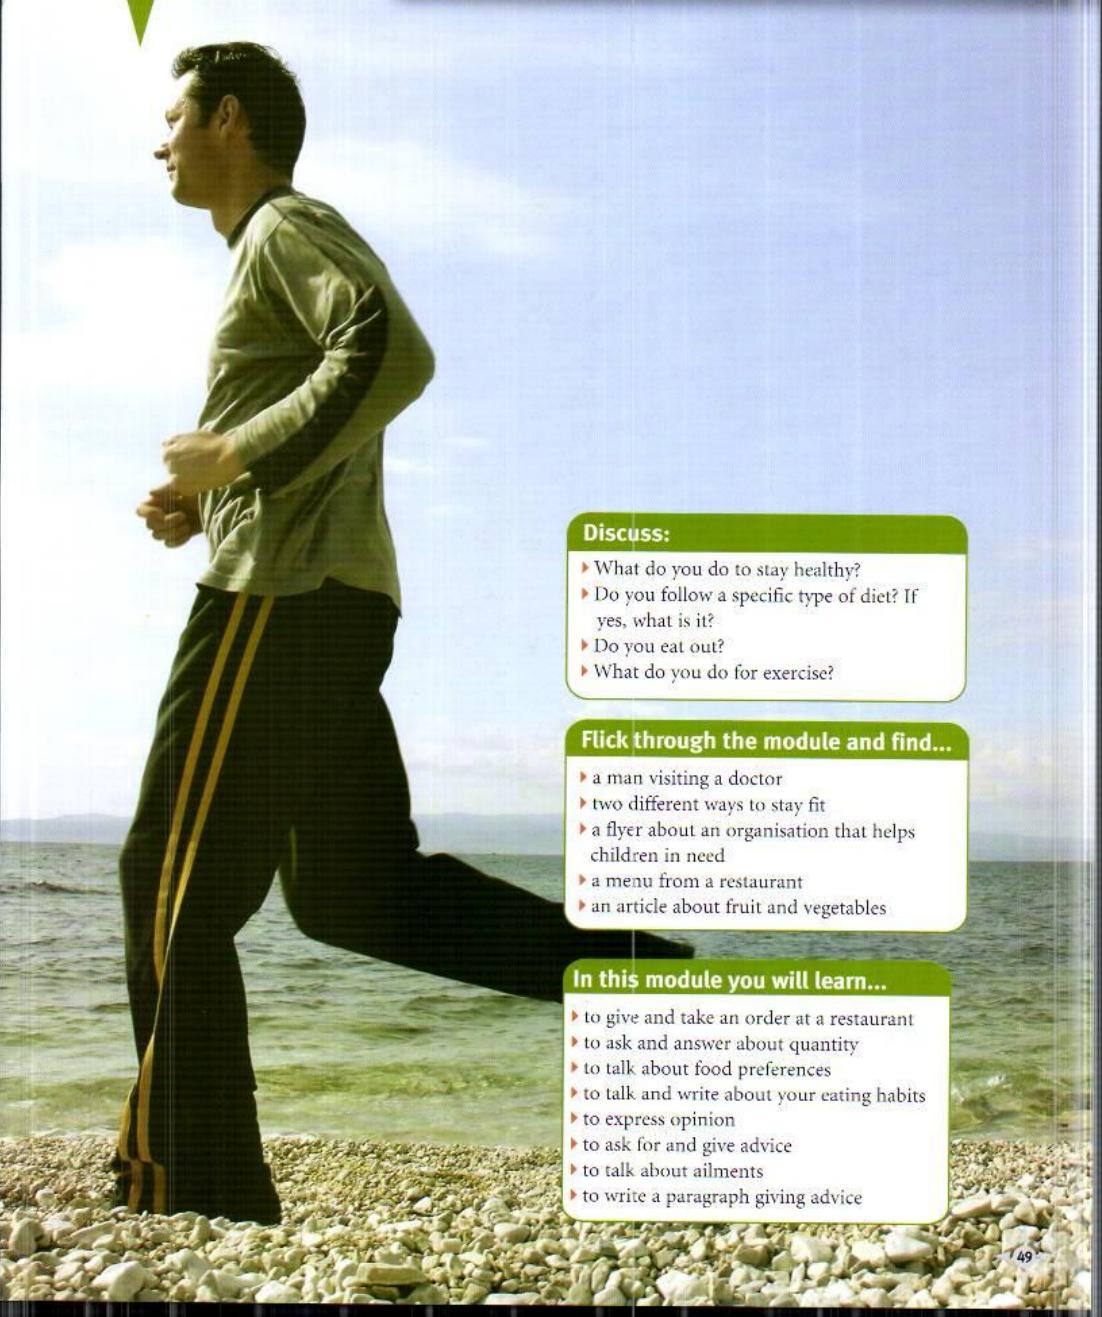

The "tornado season" is usually in spring, but the people of "Tornado Alley" are always ready for them and they always listen to the news. When the sirens go off, people use their disaster plans. At home, the best place is the basement, or a room with no windows, like the bathroom.

"At school we have frequent drills, so we never panic when there's a tornado," says Allan Taylor, a high school student from Texas. "There's no basement at my school so we usually go to the hallways on the lowest floors. Of course, we never sit near the windows".

After the tornado, people first check to see that it's safe to go out and then they check the buildings and the area for damages. And usually there is a lot of damage!

1. How many tornadoes are there every year in "Tornado Alley"?
2. Where is "Tornado Alley"?

A. Look at the pictures and the title of the text. What do you know about the education system in your country? Do you know anything about the British education system? Listen, read and check your answers.

The Saudi vs the British education system

The Saudi education system

Basic Education

Saudi basic education starts at the age of 6 and has three stages: the pre-school level, mostly found in big cities, the elementary level for children aged 6-12 and the intermediate level, for children from 12-15.

Secondary education

Secondary education in Saudi Arabia lasts three years for students from 15-18. Saudi students can choose between general and specialised education, for example technical or religious.

Higher education

Saudi Arabia has 32 state and private universities and colleges and you need about 4 to 6 years to get a degree. Many Saudi universities, like King Saud University and KAUST are among the best in the world.

The British education system

Primary Education

Primary education starts at the age of 5. Primary schools consist of infant schools for students five to seven years old, junior schools for children seven to eleven years old and combined infant and junior schools for both age groups.

Secondary education

From the age of 11-14, students study subjects like Maths, Science, English, etc. At the age of 14, they start preparing for their GCSE exams, with which they finish compulsory education. Then, they can look for a job or continue for two years to get their A-levels, the entrance exams for university.

Higher education

About 1/3 of young people go on to higher education at the age of 18. You usually need three years to get a degree. Nearly all UK universities and colleges are public institutions and they have a good reputation worldwide. The most famous universities are Oxford and Cambridge.

Eid al-Adha “The Festival of Sacrifice”

It is an important religious holiday Muslims celebrate worldwide.

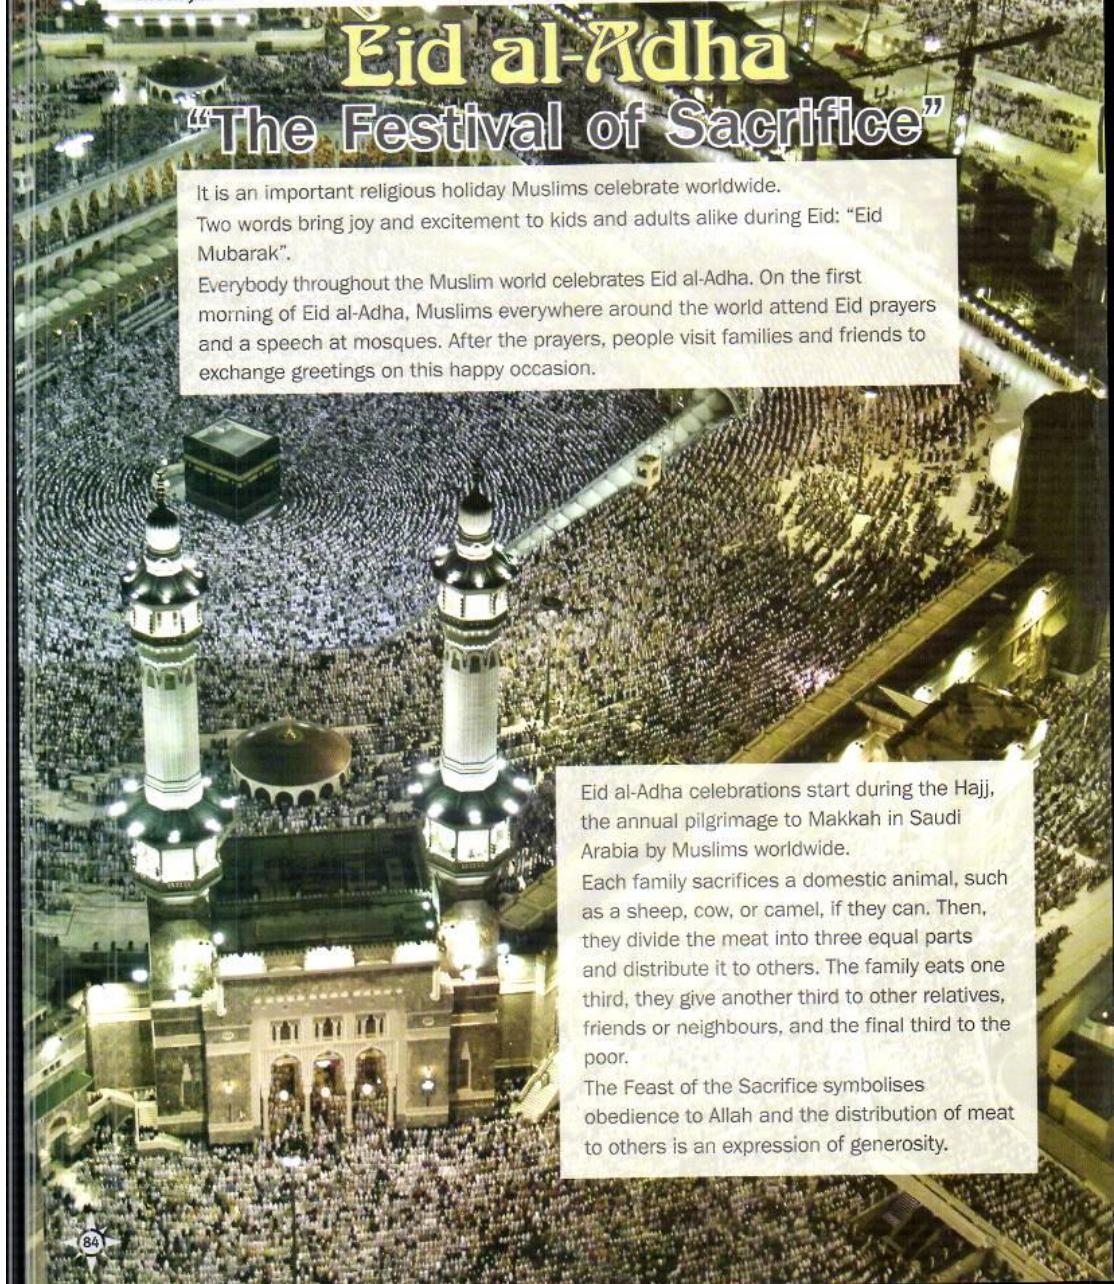

Two words bring joy and excitement to kids and adults alike during Eid: “Eid Mubarak”.

Everybody throughout the Muslim world celebrates Eid al-Adha. On the first morning of Eid al-Adha, Muslims everywhere around the world attend Eid prayers and a speech at mosques. After the prayers, people visit families and friends to exchange greetings on this happy occasion.

Eid al-Adha celebrations start during the Hajj, the annual pilgrimage to Makkah in Saudi Arabia by Muslims worldwide.

Each family sacrifices a domestic animal, such as a sheep, cow, or camel, if they can. Then, they divide the meat into three equal parts and distribute it to others. The family eats one third, they give another third to other relatives, friends or neighbours, and the final third to the poor.

A. What do endangered, extinct in the wild and extinct mean? Listen, read and find out.

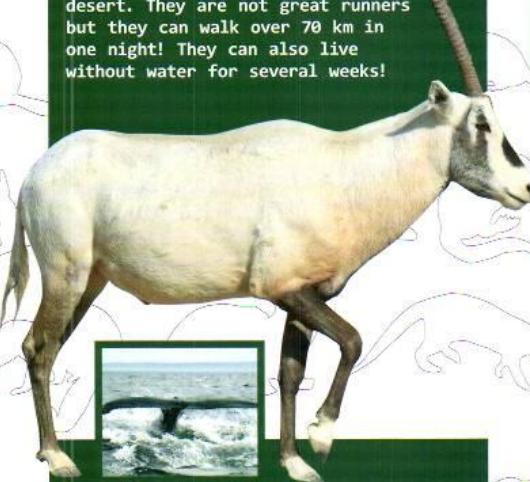

ANIMALS in DANGER

endangered

extinct in the wild

extinct

The Arabian Oryx lives in Saudi Arabia and in some other parts of the Middle East. There are about 1000 Arabian Oryx in the wild, mainly in the desert. They are not great runners but they can walk over 70 km in one night! They can also live without water for several weeks!

The blue whale is the biggest animal ever to live on Earth. Blue whales can be 33 metres long and weigh 180 tonnes. They're endangered because people (whalers) hunt them.

At the Charles Darwin Research Station on the island of Santa Cruz there is a giant tortoise. His name is Lonesome George and he is the last known Pinta island tortoise in the world.

He is 60-90 years old and he is in good health. He is quite lonely, though.

There are about 150 Barbary lions in the world and they all live in zoos. They are very big animals and can weigh up to 270kg. There were Barbary lions in the Tower of London from the 13th century until 1835 when zookeepers moved them to London Zoo.

The Thylacine, also called the Tasmanian Tiger or Wolf, became extinct in Australia thousands of years ago, but continued to live on the island of Tasmania until the 20th century. People hunted them till extinction and the last one died in a zoo in 1936.

Dodos lived on the island of Mauritius and they became extinct in the 17th century. When sailors first arrived on the island, they didn't hunt them very much because they didn't taste nice. But the sailors destroyed the forest and brought other animals, like cats and rats onto the island. These animals ate dodo eggs and now dodos don't exist any more.

B. Read again and answer the questions.

Lifetime Friendships

It is true that we make friends who have similar personalities to ours even if they live separate lives. Also, they complete us, because friends usually have some characteristics that we don't. For example, Tom says he found a brother in his best friend, Fred: "Fred is a great friend. I feel that we understand each other completely, like brothers do. He is better than me in many ways. For example, he is never aggressive and helps me calm down when I am upset."

Last year, my son and I were in Buraydah and decided to go camel riding. It's common for people to travel around the desert by camel, but camel riding is also the most popular way for visitors to visit the desert. A camel is a very tall animal, so I was trying not to look down. As we were riding, a snake attacked my camel, and it started running around like crazy. Luckily, nothing happened, but I was terrified.

Daniel

A couple of years ago I visited my cousin in the States. That was when I first rode the Segway PT, and I was amazed. You see, the Segway is the best and quickest way to get around the city. You can avoid crowded buses and heavy traffic and it is environmentally friendly too. So, when I got back home, I ordered one over the Net. Of course, I couldn't afford the latest model so I got the cheapest one on the market. The Segway is so convenient!

Neil

My family and I visited Thailand last June and we had an unbelievable experience. It is an amazing place and it looks even better when you are on top of the largest land animal in the world. PERSONAL HEROES

Everybody has a person they admire and want to be like. Today, we give some of our readers the opportunity to show how grateful they are to their personal heroes. They help them become better people and that's the most important thing!

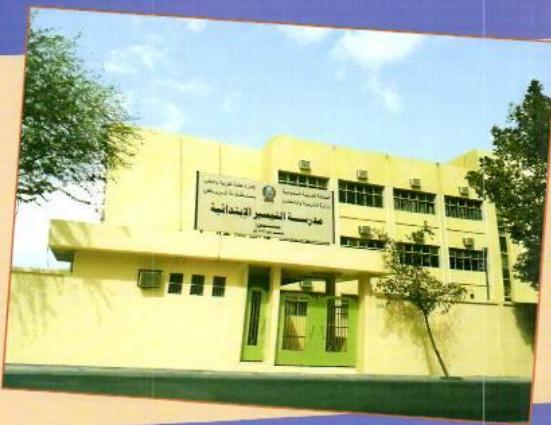

This is my uncle Ahmed! He's a firefighter and I admire him because he risks his life every day to save other people. He's a very honest and brave man. In fact, he was in the local newspaper once because he went into a burning house and rescued an old woman. He's also very active. We spend a lot of time together and I learn a lot about the dangers of his job. Actually, I always have a great time when he's around, but not just because we play and tell jokes. He teaches me how important it is to be able to help others and become a good person. That's why I'd like to be like him when I grow up.

Ali

I have so many things to say about my brother. The most important, though, is that I truly admire him. Ian was born deaf and he went to a special school. Although he had a lot of difficulties, he always acted like any other ordinary person and that's amazing to me. He's very funny and friendly, but he's also hard-working and he takes part in a lot of volunteer work. We like hanging out together of course, but we also argue a lot, like all brothers do.

- You have to keep to the speed limit. You also have to drive slowly in front of schools.

Differences

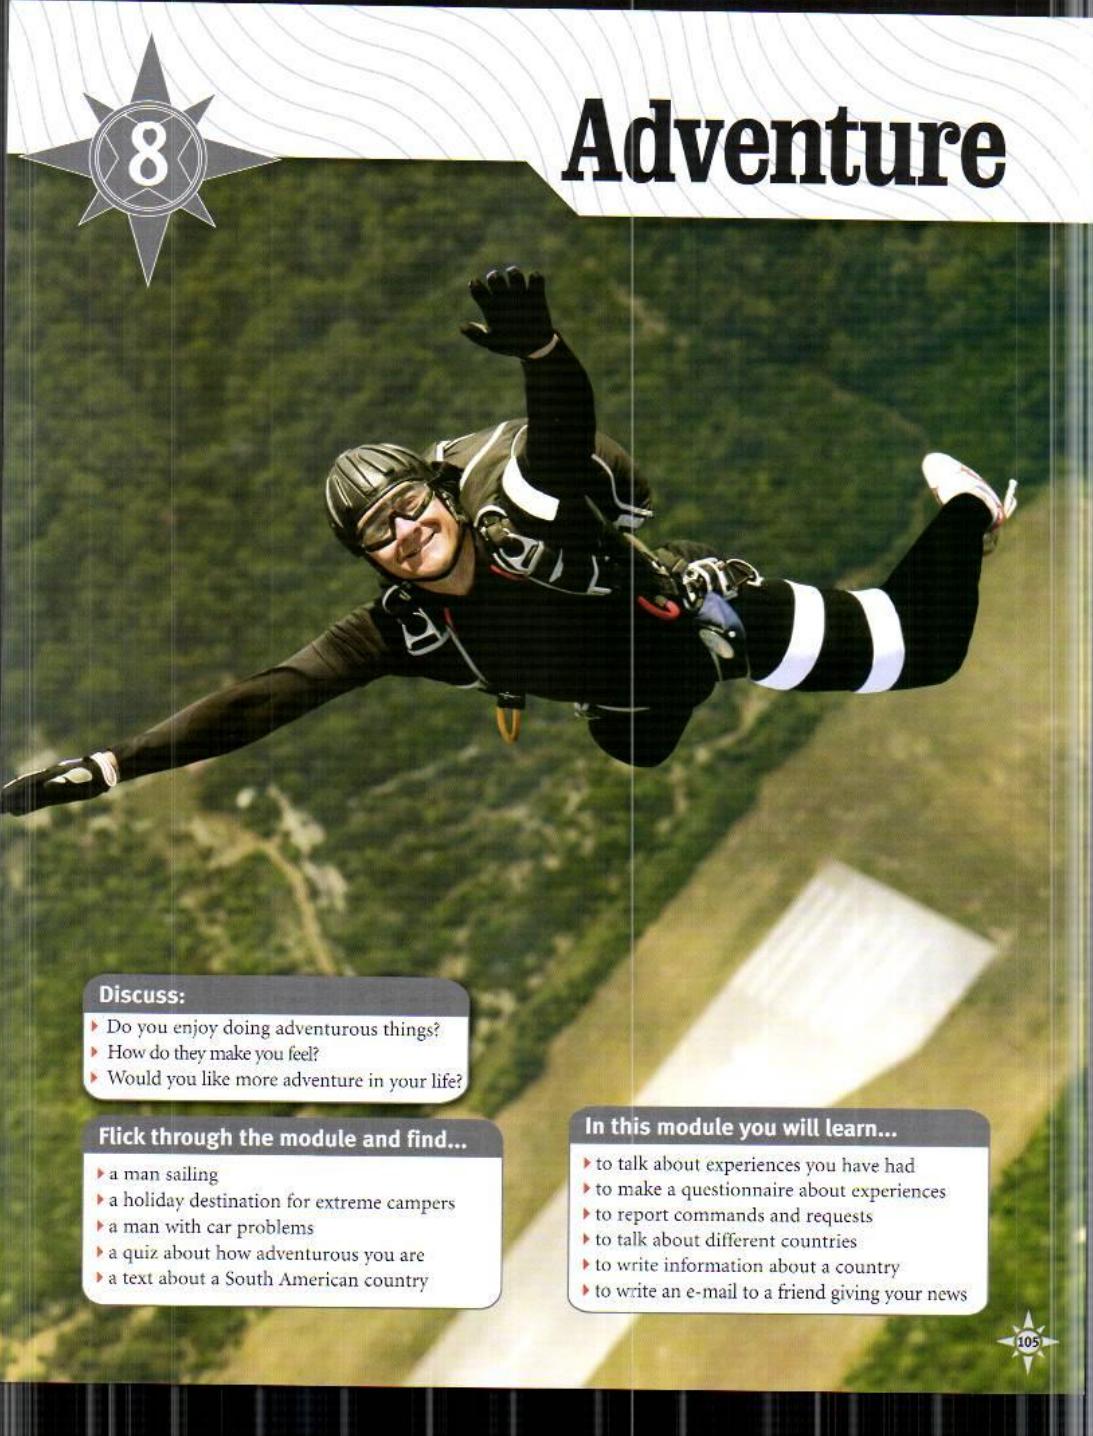

- In Saudi Arabia, you have to be 18 to drive a car or ride a motorbike, but in the UK you have to be 17 to drive a car and you need to be at least 16 to ride a motorbike.
- In Saudi Arabia, as well as most parts of the world, people drive on the right side of the road, but in the UK and a few other places, they drive on the left!
- Saudi Arabia has an organisation to help drivers called the Arabian Automobile Association (AAA) and the UK has a similar organisation called The Automobile Association (the AA).

So, be extra careful if travelling from Saudi Arabia to the UK or another country. Driving laws could be very different!

PE

A. What do you know about ice hockey? Listen, read and check your answers.

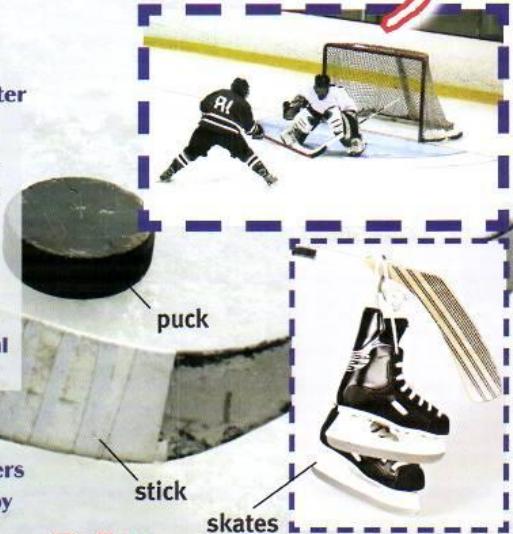

ICE HOCKEY

History

Ice Hockey, or hockey, is an exciting winter sport played on an ice rink. The modern game started in Montreal, on 3rd March, 1875. In the USA, the first hockey game was between Yale University and Johns Hopkins University in 1893. Today, the National Hockey League (NHL) is the largest organisation for the sport in the US and Canada, and hockey is the official winter sport of Canada.

The game

There are six players in each team. Players skate on the ice and try to score a goal by shooting the puck into the other team's goal. There are three twenty-minute periods. If there is a tie at the end, there can be an extra "sudden death" overtime period, or even a shootout. In a shootout, the players take turns trying to shoot the puck into the other team's goal.

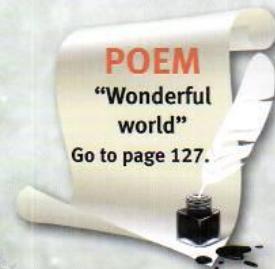

Rules

There are referees and officials on and near the ice to make sure no one breaks the rules. When players break the rules, they go to the "penalty box" and sit there (for two, four or five minutes) until their penalty is over. Examples of offences are: moving the puck with your hands, raising your stick too high (high-sticking) or tripping another player.

B. Read again and write T for True or F for False.

1. Two universities played in the first hockey game in the USA.
